

## Job Announcement

Established in 2002, ATS is the one of the leading and fastest growing company in Cambodia designing, manufacturing and proposing energy distribution solution meeting the specific needs of the industry, infrastructures, energy, building and transportation markets.

Our product portfolio includes: Low and Medium Voltage switchboards (OEM), Busways, Distribution transformers, Automation solutions, Power electronics, Energy conversion and professional LED lighting.

To cope with the quick growth of our company, we are looking for the following candidate:

### Position: IT Engineer / Software Engineer

Report to: MIS Manager

Location: ATS Factory

### Key Role: Development of the software and IT system with Google Cloud, SAP, BPM and REST APIs

In strong partnership with Google, BonitaSoft and SAP Business One, ATS is adopting the Industrial Revolution 4.0 and going digital with the development of its information system to manage data and automate the key business activities. The project scope includes the setup of the cloud-based server architecture, the database design, the applications' integration (back-end and front-end user interfaces) and the documentation edition. Please refer to attached picture for an overview of the high-end system architecture.

### Responsibilities:

To help us succeeding in this audacious strategy, we are actively looking to welcome a talented software/IT engineers for a permanent position. The responsibilities of the job include, but are not limited to:

- Development of the MIS software application
- Data model and database design and development (SQL)
- Integration of external business application via RESTful APIs
- SAP Business One migration and deployment in Google Cloud
- Install the supporting IT high-end architecture
- Edition and validation of the technical documentation
- Coordination of the project team.

### Key Notes:

|                                               |                                            |
