

Job Announcement

Established in 2002, ATS is the one of the leading and fastest growing company in Cambodia designing, manufacturing and proposing energy distribution solution meeting the specific needs of the industry, infrastructures, energy, building and transportation markets.

Our product portfolio includes: Low and Medium Voltage switchboards (OEM), Busways, Distribution transformers, Automation solutions, Power electronics, Energy conversion and professional LED lighting.

To cope with the quick growth of our companies, we are looking for the following candidate:

Position: Mechanical Designer

Report to: Industrial & Manufacturing Mechanical Manager

Report from: Department Related

Location: Phnom Penh

Key Role:

Mechanical designers need to create designs for mechanical devices and equipment. Designers may also work with engineers and other professionals to create or improve manufacturing systems or processes.

Responsibilities:

- Responsible to Define products specification
- Responsible for Raw-material properties
- Responsible for Products improvement
- Responsible for Structures analysis
- Responsible for Accessories analysis

Key Notes:

Being able to pay attention to detail to do this job effectively. You are working with Method information and product information; you'll need to enter such information accurately and in a timely manner. Having good communication skills and the ability to adapt quickly to changing environments is important, too.

Requirements:

- Bachelor Degree in Mechanical or Electrical Engineering or similar.
- 1 Year minimum experience in operation job is a must.
